How to Create Order Numbers

Think of the Product Number as a prefix which requires additional information to indicate options and vinyl selection. Begin with the Product Number adding desired option codes as shown in the Product Option Charts. Unless otherwise indicated, put the tier and/or color selection using the appropriate vinyl tier format shown as follows:

-xx in the product number is the placeholder for vinyl choice
-y is the placeholder for paint color choice (170 Over Bed Tables)

For example: 973 Physician Stool with D-Handle Release and Polished Aluminum Base in Tier 2 fabric with added Crescent Back, 7" Seat Height, Footrest and Soft Wheels would be ordered as 973CB-7-FR-T2-SW

COM Disclaimer

The tiered products listed on the following pages have been tested, approved and will produce the desired results required by our quality department. Please remember any Customer's Own Material (COM) must be approved by our COM department. Due to the nature of our product, some COM material may not perform or upholster to our standards, for which Intensa® will not be responsible. Submit sample to Intensa 1810 S. Elm Street, High Point, NC 27260.
